According to the Census of Agriculture, the number of female principal farm operators in Texas increased 10 percent between 2007 and 2012. The complex task of balancing work and family makes the concerns of farm/ranch women unique.

Annie's Project is designed to provide a support network of other women facing similar challenges. All program classes enable sufficient time for discussions in a "safe harbor" learning environment. Everyone is encouraged to share their observations, concerns and questions.
